

COVID 19 Offerings
HEALTHCARE

GST Products & Resources for COVID-19 Healthcare Management

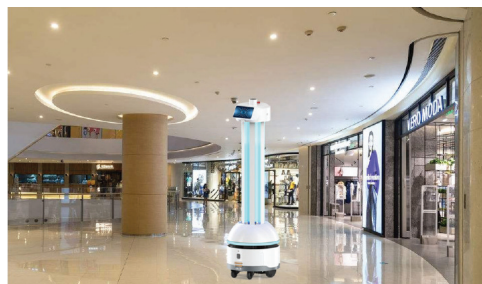

Health Flex Hand Sanitizing Stations

With a flexible mounting bracket capable of holding 24" or 27" LCD displays and an optional touchless dispenser for hands-free sanitizer, the ViewSonic Health Flex station makes displaying health notices, business information, and promotions easier than ever. Health Flex stations can be adapted to include wired or wireless media players, cameras or sensors for real-time safety analysis.

AC UV Clean & Charge Cabinets

Take extra steps to make sure all devices from phones and tablets to MacBooks and Chromebooks are safely cleaned, charged and secured. Each row comes equipped with UV-C bulb that radiates light at 254nm, which is the ideal wavelength for killing bacteria and viruses, such as COVID-19. UV light is harmful to human skin and eyes. The system has a safety feature that will shut-off all lights when the door is opened.

UVC Sterilizing Robot

The Artemis V6 Robot uses Philips UV-V ultraviolet sterilization bulb and cutting edge AI technology to autonomously disinfect a designated area. Eliminate 99.9999% of viruses, bacteria, and mold with a touch of a button. With health and safety becoming more important in our daily lives, the Artemis V6 Robot adds an additional level of cleanliness and sterilization.

For help building technology solutions that enhance COVID-19 Healthcare Management, email info@gstes.com

Golden Star Technology (GST) is one of the leading IT and AV solutions provider and systems integrator in the United States. GST provides comprehensive solutions that include the latest technologies, products, and design methodologies.

Networks & Back Office

Volumes of sensitive data and materials combined with the flux of personnel, patients and visitors on site present a security risk for our healthcare providers. Computer hacking, ransomware and domestic disturbances add to the turmoil.
